

# Leadership 1 for Fire & EMS: Strategies for Company Success

This National Fire Academy course provides Company Officers with the basic leadership skills and tools needed to perform effectively in the fire service environment. The course encompasses techniques and approaches to problem solving, ways to identify and determine the needs of the Company Officer's subordinates, methods for running effective meetings in the fire service environments, and various decision making skills for the company officer.

The course target audience includes: line fire officers, unit commanders, program supervisors, fire or rescue personnel due for promotion/appointment to officer rank or supervisory position within six months, training officers, staff, or administrative officers.
